Project Díon - Transformational project to bring about Changed Ways of Working and Process Improvement Underpinned by Technology

Digital Transformation in Housing Administration Workshop
Housing Practitioners Conference
10 April 2025

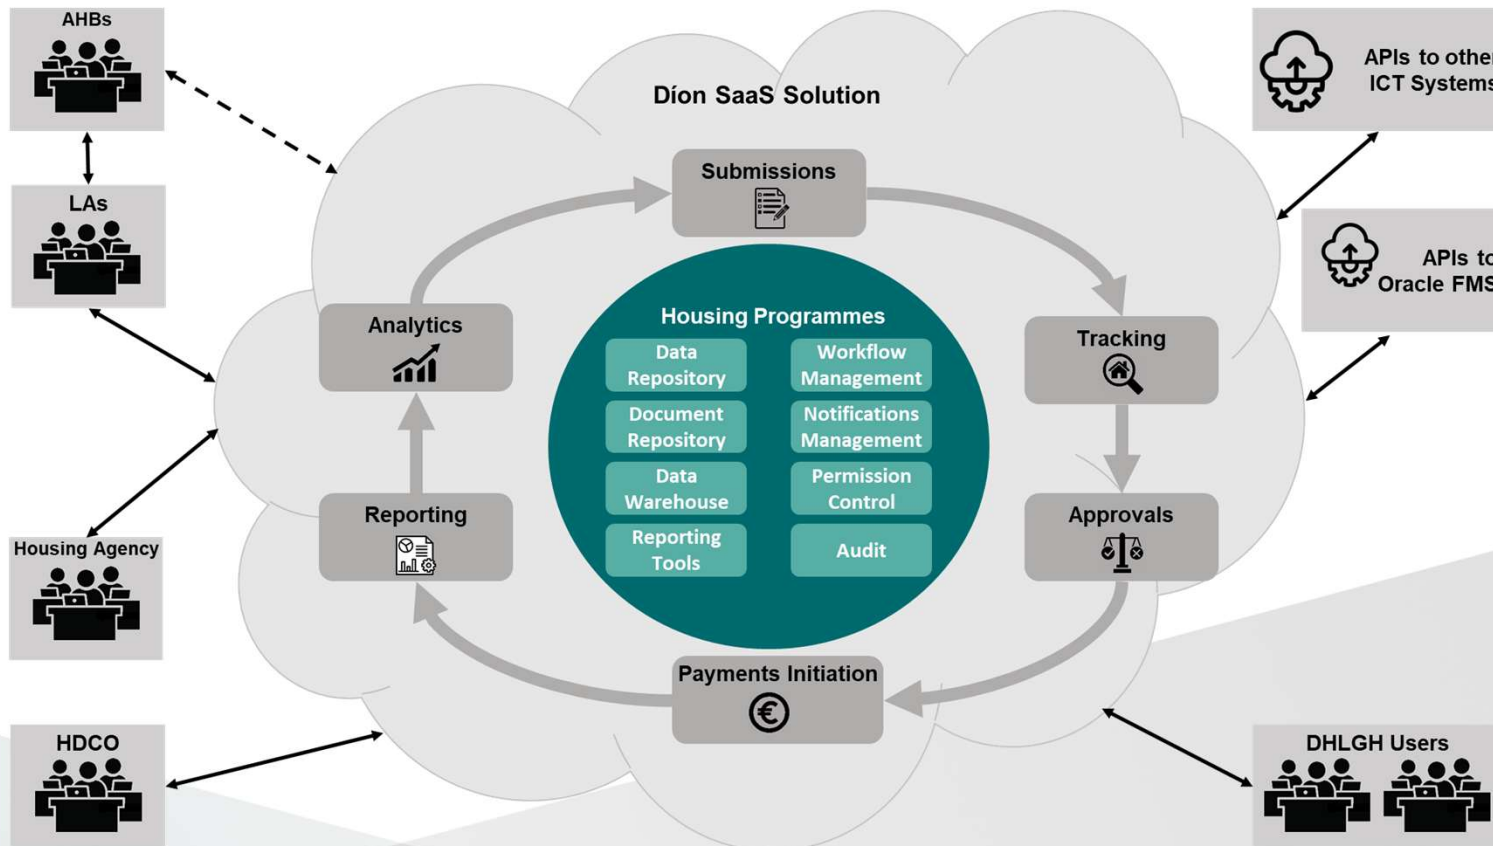

What we want to get out of the session today

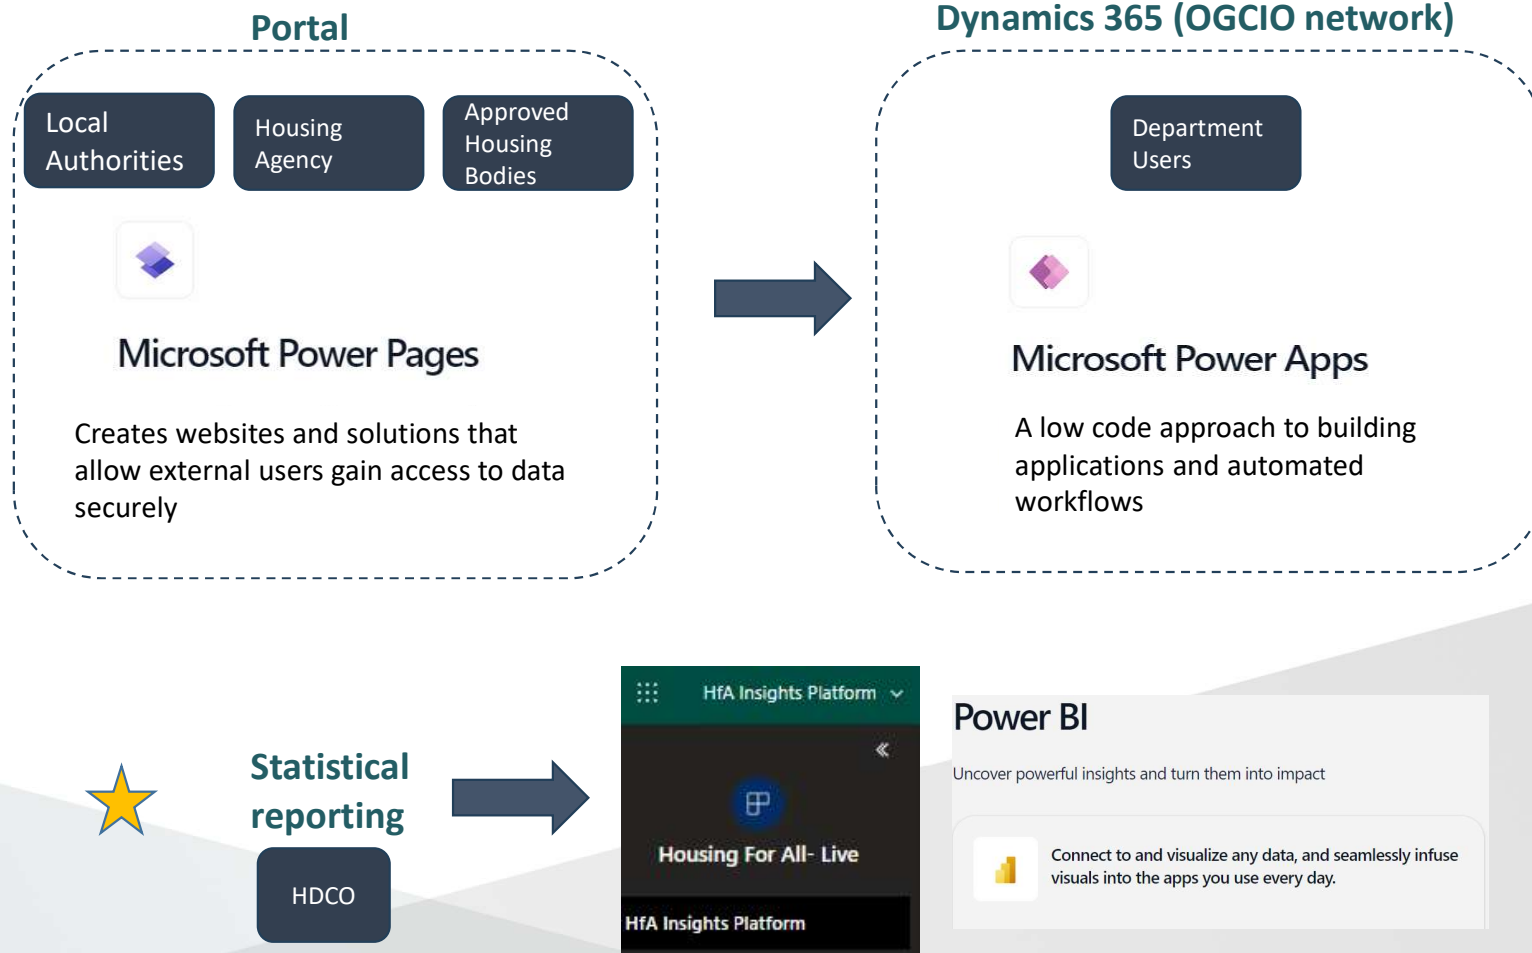

1. *What housing administration challenges could be overcome through digital transformation and better use of existing technology?*
 - *What advantages of existing systems could be better leveraged?*
 - *What benefits can you see from further digital transformation enhancements?*
 - *What types of technology?*
 - *Are there any immediate/early opportunities from technology that could be in place in the next 12 months?*
2. *Are there any challenges/hurdles that would need to be addressed to take advantage of these opportunities?*
 - *Why hasn't it happened before now?*
 - *What steps would need to be taken to get to a better position?*
 - *Any practical ideas for how these could be addressed?*
3. *Alternatives – what happens if we don't update the technology?*

Planned Díon system future state

Overview of technology

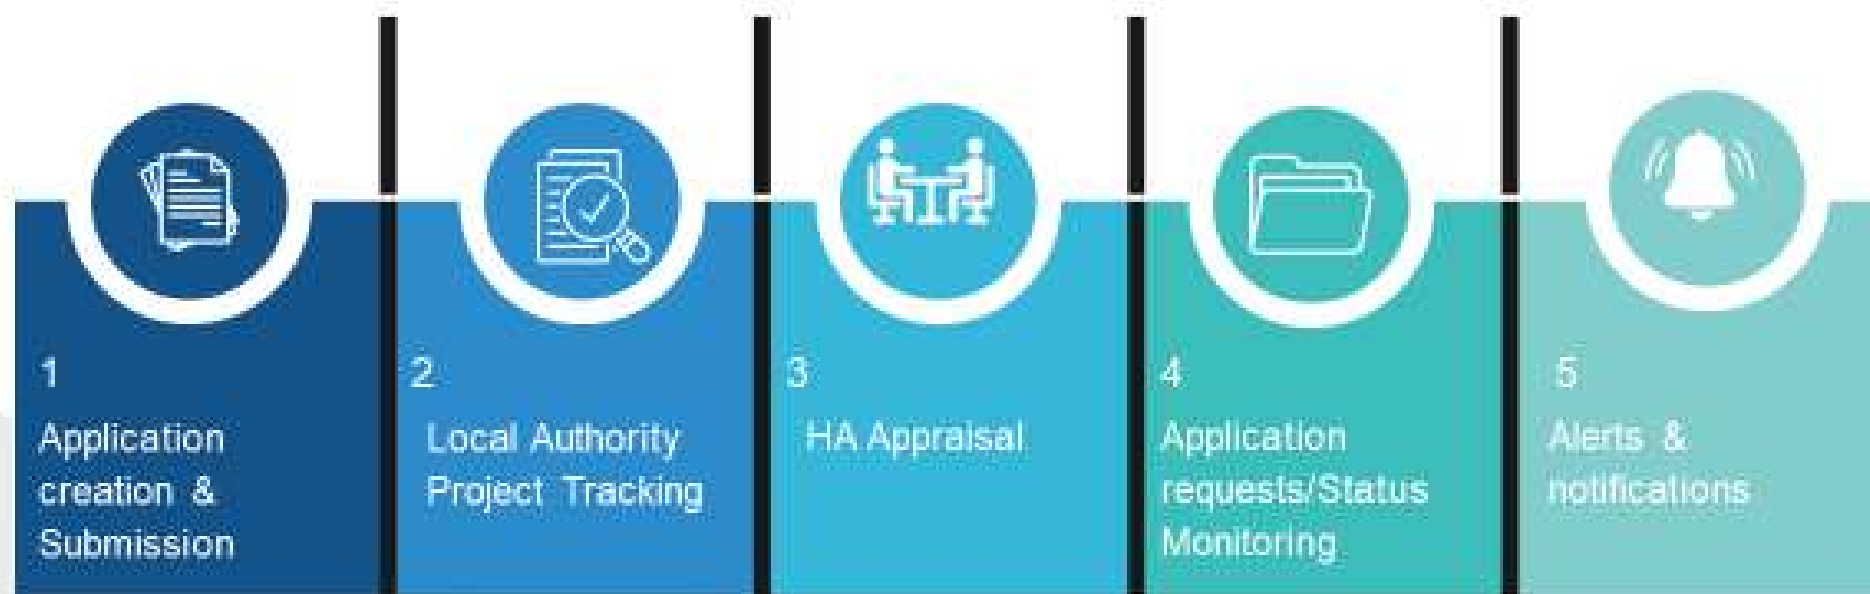

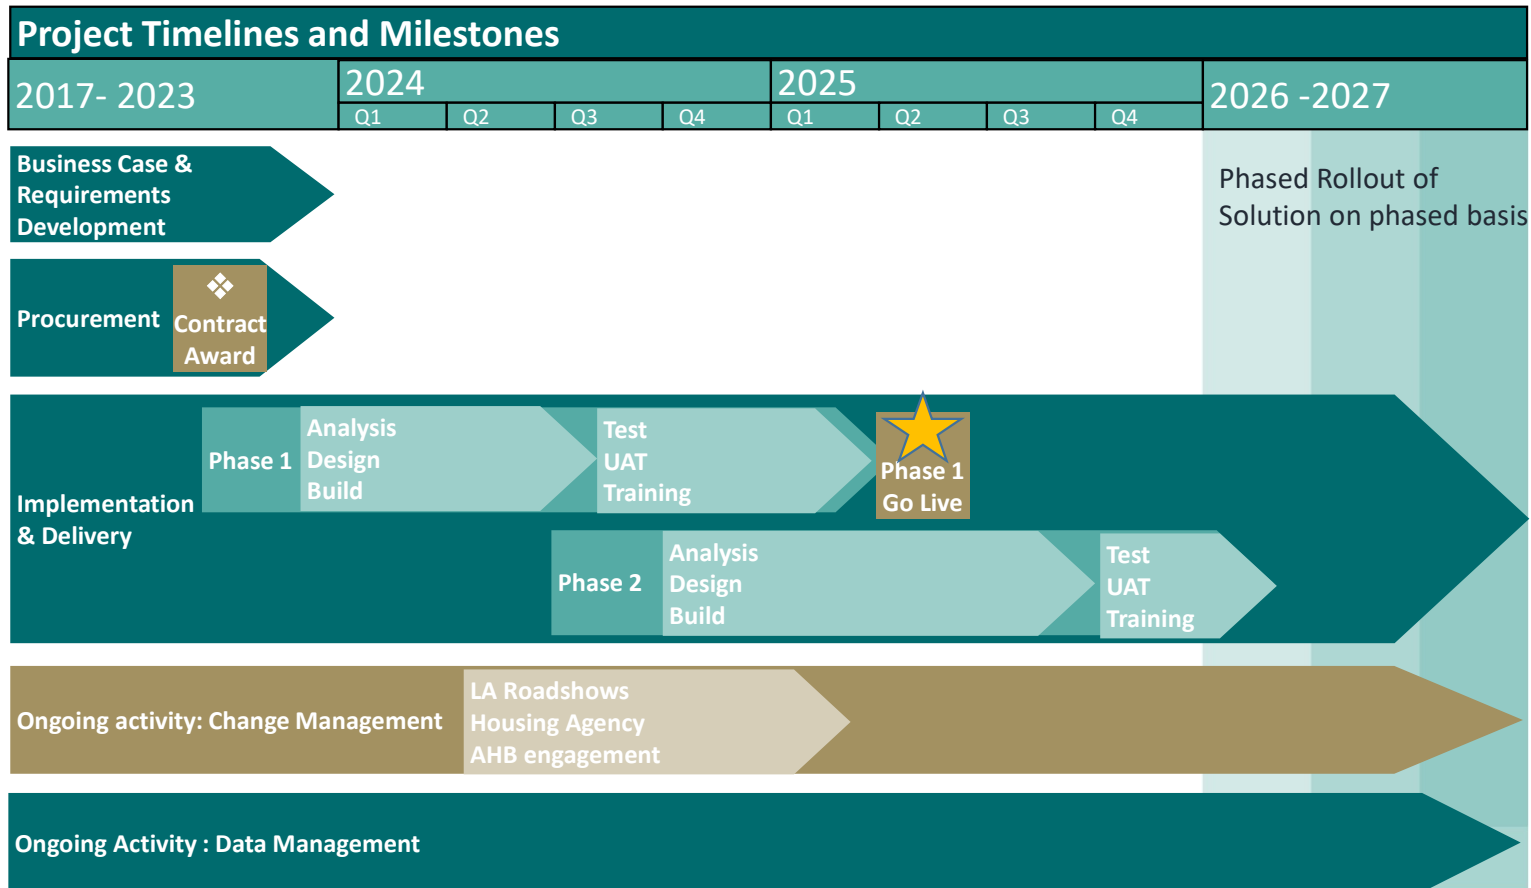

Power Pages

Portal Functionality

How will Local Authorities use the platform?

Project Díon – Overall Timeline Across all Work streams

Action 24.10:
Implement an integrated housing delivery tracking solution

**Housing Policy Objective 4:
Increase Social Housing Delivery**

Action 4.1: Deliver over 10,000 social housing homes each year to 2030 and increase the stock of available social housing

**Housing Policy Objective 24:
Build Institutional Capacity across the
DHLGH, Local Authority,
State Agency and AHB Sectors in order to
support Housing for All**

Action 24.2: Promote the digitalisation of housing and planning services, to improve the efficiency of delivery and customer services

Relevant HFA Public Service Delivery WG areas of focus: Public Sector processes

- reforms\streamlining of public procurement and approval processes for housing/infrastructure delivery
- delivery of associated critical infrastructure for housing
- identifying blockages and areas of underperformance and seeking to resolve these

Background – “The Why?”

- Limited investment in common technology solutions to support the delivery of housing programmes
- Largely manual processes, recorded on standard software products
- Very little information stored on centralised systems for use by the Department and Local Authorities

- Difficult to generate a single accurate picture of the status of housing programmes
- Significant time and effort spent on ensuring and validating the quality of information

Current Challenges

- Multiple channels for submission of information
- Inefficient Information and Data Sharing
- Lack of Visibility of Current Data
- Inability to Track Project Status
- Real Time Payment Details currently unavailable

Díon solution – positive change

- Ease of Use – Intuitive System
- Single Source of Information
- Standardised Processes
- Data Sharing Facility
- Real Time Visibility of Data
- Ability to Track Project Status
- Visibility of Real Time Payment Details

Department of Housing,
Planning and Local Government

1. *What next for Díon?*
 - *Are there APIs that should be considered for Díon 1.0?*
 - *What next for Díon 2.0?*
2. *What next beyond Díon:*
 - *What is already happening elsewhere?*
 - *Is it being done at individual org level or co-ordinated?*
 - *What can be done in parallel?*

3. *What housing administration challenges could be overcome through digital transformation and better use of existing technology?*
 - *What benefits can you see from further digital transformation enhancements?*
 - *What types of technology?*
 - *What advantages of existing systems could be better leveraged?*
 - *Are there any immediate/early opportunities from technology that could be in place in the next 12 months?*
4. *Are there any challenges/hurdles that would need to be addressed to take advantage of these opportunities?*
 - *Why hasn't it happened before now?*
 - *What steps would need to be taken to get to a better position?*
 - *Any practical ideas for how these could be addressed?*
